This path-breaking book is essential reading for health psychologists, sociologists, welfare economists, social policy analysts and all those concerned with the future of developed societies.

Among the developed countries it is not the richest societies which have the best health, but those which have the smallest income differences between rich and poor. Inequality and relative poverty have absolute effects: they increase social cohesion. As well as inequality weakening the social fabric, damaging health and increasing crime rates, inequality is corrosive: it erodes the foundations of trust and cooperation. This reduces trust and cooperation. This reduces the confidence that people feel in institutions and in each other.

Inequality among the developed countries is not the richest societies which have the best health, but those which have the smallest income differences between rich and poor. Inequality and relative poverty have absolute effects: they increase social cohesion. As well as inequality weakening the social fabric, damaging health and increasing crime rates, inequality is corrosive: it erodes the foundations of trust and cooperation. This reduces trust and cooperation. This reduces the confidence that people feel in institutions and in each other.

Among the developed countries it is not the richest societies which have the best health, but those which have the smallest income differences between rich and poor. Inequality and relative poverty have absolute effects: they increase social cohesion. As well as inequality weakening the social fabric, damaging health and increasing crime rates, inequality is corrosive: it erodes the foundations of trust and cooperation. This reduces trust and cooperation. This reduces the confidence that people feel in institutions and in each other.

Healthy, egalitarian societies are more socially cohesive. They have a stronger community life and suffer fewer of the corrosive effects of inequality. As well as inequality weakening the social fabric, damaging health and increasing crime rates, inequality is corrosive: it erodes the foundations of trust and cooperation. This reduces trust and cooperation. This reduces the confidence that people feel in institutions and in each other.

Comprehending as with ease as concord even more than extra will meet the expense of each success. adjacent to, the power of this Unhealthy Societies: The Afflictions of Inequality can be taken as capably as picked to act.
